JADESTONE AWARDS AIRNORTH CONTRACT EXTENSION FOR CHARTERED AIR SERVICES

Airnorth has successfully retained the contract to provide chartered air services to Jadestone Energy between Darwin, Northern Territory and Truscott- Mangalalu Airport, Western Australia.

The contract extension highlights Jadestone's confidence in Airnorth and its capability to service large oil and gas contracts.

Airnorth CEO Daniel Bowden was delighted to retain the extension, expressing that "The team at Airnorth are proud of the service we have delivered to PTTEP over the past 4 years, and that this has been recognised by Jadestone the new operators of the Montara Project. We look forward to supporting Jadestone and their staff with twice weekly flights on Tuesday and Thursday with our Embraer E120 fleet."

Airnorth will continue to operate two weekly air services to Truscott-Mungalalu Airport located 520kms west-southwest of Darwin. The route will be serviced with Airnorth's Embraer 120 fleet, a 30-seat aircraft proven to be successful due to its size and speed, allowing for faster and more direct air services from its home base in Darwin.
